

## GREENTREE VILLAGE PONDS

On January 28, 2002, the Board of Supervisors directed staff to form a multi-agency committee to develop a unified position on the use of regional ponds, as well as alternative types of stormwater controls, as watershed management tools. In addition, on February 25, 2002, the Board directed staff to review the issues outlined in an Environmental Quality Advisory Council (EQAC) resolution regarding regional stormwater management.

In April 2002, the Fairfax County Environmental Coordinating Committee formed a "Regional Pond Subcommittee," which spent several months identifying the issues; reviewing current policy, regulations, and practices; researching the experiences of other jurisdictions; and reviewing alternatives to regional ponds. The subcommittee compiled its findings, met with a group of stakeholders and peers, held a public meeting, and prepared a list of recommendations.

The Regional Pond Subcommittee is comprised of representatives from the Department of Public Works and Environmental Services, the Department of Planning and Zoning, the Fairfax County Park Authority, the Northern Virginia Soil and Water Conservation District, and the Environmental Quality Advisory Council.
